Digitiliti Named Finalist for 11th Annual Tekne Awards

MHTA will recognize Minnesota's top technology companies and individuals at the Nov. 3 awards ceremony

ST. PAUL, Minn., September 13, 2010 – The Minnesota High Tech Association (MHTA) has named [Digitiliti, Inc.](#) (OTC: DIGI), the leader in Intelligent Information Management and Compliance solutions for small to mid-sized enterprises, as a finalist in the IT Software & Hardware, Communications and Infrastructure category for the 2010 Tekne Awards, which will be held at the Minneapolis Convention Center on Wednesday, Nov. 3. The Tekne Awards recognize Minnesota companies and individuals who have shown superior technology innovation and leadership.

Finalists for this award have shown great success on software and hardware, networking, communications and wireless equipment and products. Digitiliti is being recognized for its [DigiLIBE™](#), which solves fundamental problems associated with managing, controlling, securing, accessing and using unstructured data. DigiLIBE provides an integrated Virtual Corporate Library (VCL) with policy-based controls to protect the confidentiality, integrity and availability of unstructured data from its point of origin to final disposition. Businesses now have the ability to securely mine the knowledge buried within their unstructured data.

DigiLIBE addresses information growth across all points of an organization including office files, email, images, primary, secondary, offsite, and active archives. As a single

architecture comprised of three simple components – information director, archive information store, and client agents – DigiLIBE reduces the number of disparate IT products needed, and the complexity and costs involved with managing and supporting information growth.

“We are tremendously honored for being recognized among the best in technology offerings among Minnesota firms and look forward to the Tekne Awards annual ceremony,” said Ken Peters, Executive Vice President of Digitiliti. “DigiLIBE helps companies easily unlock the value of corporate data and transform it into information that can help them make better decisions faster and easier than ever before. Improved information management and operation business intelligence can be achieved by reducing storage costs and risk of losing business-critical information while extracting more value out of the content your organization creates daily.”

Presented by the MHTA in partnership with the BioBusiness Alliance of Minnesota, LifeScience Alley, Enterprise Minnesota, the Tekne Awards annually recognize Minnesota’s best and brightest technology users and developers in innovation, development, education, commercialization and management. A full list of finalists is available online at <http://www.tekneawards.org>.

“The Tekne Awards recognize those whose leadership and dedication to technological development helps demonstrate Minnesota as a global player in technology-based markets,” said MaryFrances Schurb, interim president of MHTA. “This year’s finalists should be extremely proud of their role in helping Minnesota excel.”

Recipients of the 2010 Tekne Awards will be announced at the award ceremony on Nov. 3. The event will begin with a VIP registration & reception at 4:30 p.m., followed by general registration and cocktails at 5 p.m., dinner at 5:45 p.m., the awards celebration at 7 p.m., and a post-Tekne party at 8:30 p.m. The event will be emceed by Paul Douglas, author, entrepreneur and meteorologist.

To register for the 2010 Tekne Awards ceremony, visit www.tekneawards.org or contact Kathy Marsh at 952-230-4554 or kmarsh@mhta.org.

About Digitiliti Inc:

Digitiliti develops and provides advanced Information Management solutions that address the cost, complexity, and compliance problems associated with controlling and utilizing unstructured data. Digitiliti provides enterprise-class products and services that are easy to use, cost effective and always deliver the right information, to the right people, at the right time helping them make informed business decisions. Digitiliti services include DigiBAK™, a complete offsite data protection/backup solution, and DigiLIBE, a single integrated information management solution that allows customers to extract and use the valuable business knowledge hidden in their unstructured content. Digitiliti markets and sells solutions solely through its worldwide network of channel partners. For more information please visit <http://digitiliti.com>.

About Minnesota High Tech Association (MHTA)

The Minnesota High Tech Association (MHTA) promotes the growth, sustainability and global competitiveness of Minnesota's technology-based economy through public policy advocacy, member collaboration and education, and community outreach. MHTA is the only membership organization that represents Minnesota's entire technology-based economy. MHTA members include organizations of every size – involved in virtually every aspect of technology creation, production, application and education in Minnesota. MHTA works in partnership with TechAmerica, which represents Minnesota's technology organizations nationally. Find out more online at www.mhta.org or follow MHTA on Twitter at <http://twitter.com/MHTA>.
